

Atlas Copco K.K. Resident Technical Engineer based in Toyota

2018-11-05 22:26:25

Company name

Atlas Copco K.K.

Job description

**Could you be our very first Resident Technical Support Engineer based in Toyota Nagoya?
Fuji Industrial Technique, Atlas Copco Group Company**

In our global organisation, we are very keen on benefiting from your expertise across a range of functions, including technical support, on-site competence development and customer activities. This is a very high profile and exposed position, with local, regional and global focus.

Would you like to find out more? Then read on!

Your wide-ranging and exciting responsibilities cover:

- providing support to the marketing and sales teams for advance sales activities,
- gathering technical customer feedback and understanding their needs.

Alongside this, you will:

- provide your technical expertise to our local entity,
- contribute to products design improvements both from a software and hardware perspective,
- bring expert knowledge on our high end electric tightening products –in an increasingly connected world

There are many other exciting duties which we'd like to talk with you about!

As a person, you have a degree in Electronics or Software and advanced technical competences in the field of mechanics, hardware, software and technical support. You communicate fluently in Japanese and have a good level of English.

Some global travelling is required for this position – our head office is based in France and we have a worldwide reach across the Americas, Europe and Asia.
